Agenda

- Introduction
- Technical Architecture
- Core & Security
- System Snapshots

Project Overview

The Problem:

•Current methods (agencies, classifieds) are slow, expensive, or lack safety checks.

•Parents face high stress finding verified help quickly.

The Solution:

•**Smart Matching:** Connecting specific family needs with verified caregiver skills.

•**Trust-Centric:** Built-in verification and safety layers.

•**Modern Experience:** A seamless, vibrant app that makes booking care as easy as ordering a ride.

Technical Architecture

Frontend & UI

- Framework: Next.js 16 (React 19)
- Styling: Tailwind CSS 4
- Component Library: Shadcn/UI (built on Radix Primitives)
- Icons: LineIcons & Lucide React
- Language: TypeScript
- State/Utils: date-fns (Date handling), clsx & tailwind-merge (Class management)

Backend & Infrastructure

- Database: Supabase (PostgreSQL)
- Auth: Google OAuth 2.0 (via Custom Middleware/NextAuth)
- Real-time Communication: Socket.io-client
- Payments: Razorpay Integration

Testing & Quality Assurance

- E2E Testing: Playwright
- Linting & Formatting: ESLint, Prettier

DevOps

- CI/CD: GitHub Actions
- Containerization: Docker (implied from project context)

Core & Security: Building a secure and scalable foundation.

Authentication System:

•Integrated **Google OAuth 2.0** for secure, one-click sign-in.

•Session management with robust route protection (Admin vs. User).

Safety Infrastructure:

•**Middleware Ban System:** Automated access restriction for flagged or suspicious accounts.

•Strict Role-Based Access Control (RBAC) implementation.
